

In the Claims

Please amend the claims as follows. Applicants present a full set of claims showing markups of the claims with insertions and deletions indicated by underlining and strikethrough text, respectively.

1-28. (Canceled)

29. (Previously presented) A composition comprising
DAPH1 (4,5-dianilinophthalimide), and
one or more compounds that decrease calcium influx of neuronal cells caused by
aggregated β -amyloid (A β) protein degradation products.

30-33. (Canceled)

34. (Withdrawn) A method for treating Alzheimer's disease, comprising
administering an A β vaccine to a subject in need of such treatment,
administering to the subject an effective amount of the composition of claim 29.

35-48. (Canceled)

49. (Previously presented) The composition of claim 29, wherein the compound that
decreases calcium influx of neuronal cells caused by aggregated β -amyloid (A β) protein
degradation products is NBQX (2,3-dihydroxy-nitro-7-sulfamoyl-benzo[f]quinoxaline).
